---

PROFILE

Junior Software Engineer skilled in building scalable applications and deploying machine learning models. Proficient in Python, JavaScript, Flutter, and MySQL, with a focus on creating user-friendly solutions.

KEY SKILLS

- **Languages:** Python, JavaScript, Dart, SQL
- **Frameworks:** Streamlit, Flask, React, Node.js
- **Databases:** MySQL, PostgreSQL
- **ML/AI:** XGBoost, Scikit-learn, Pandas, NumPy
- **Tools:** Git/GitHub, Docker, REST APIs
- **Soft Skills:** Communication, Teamwork, Problem Solving

EXPERIENCE

Junior Software Engineer | Future Technologies Limited – *Feb 2025 – Present*

- Collaborate with senior engineers, product managers, and designers to deliver effective solutions.
- Work with QA teams to ensure thorough testing and high-quality software releases.
- Troubleshoot, reproduce, and resolve software issues promptly.
- Maintain and update technical documentation to reflect system changes.
- Collaborated with HR and IT teams to improve HRMIS system accuracy and adoption.

Freelance ML Engineer – *Aug 2024*

- Developed and deployed a **credit card fraud detection app** using Streamlit and XGBoost.
- Created a user-friendly dashboard for real-time transaction classification.

EDUCATION

BSc. in Artificial Intelligence and Machine Learning – ISBAT University, 2024

PROJECTS

- **Fraud Detection App:** Real-time classification of credit card transactions.
